NFA - Example-2

L = { Set of all strings that start with 0 }

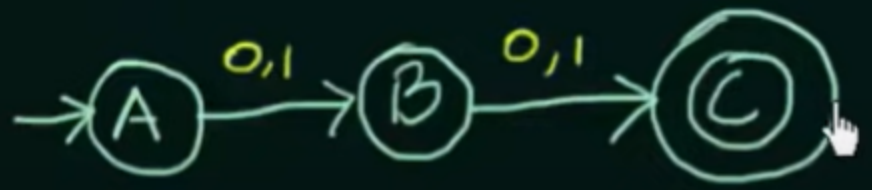
= { 0, 00, 01, 000, ... }

Eg.

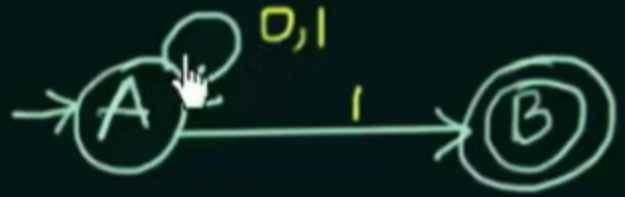
>> Construct a NFA that accepts sets of all strings over {0,1} of length 2

$\Sigma = \{0,1\}$

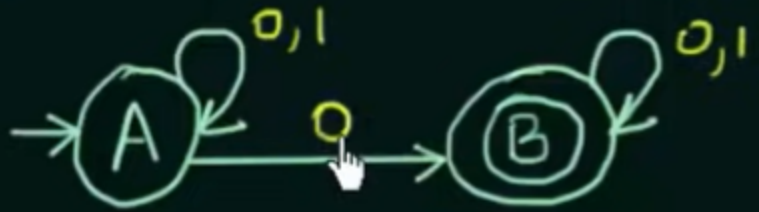
$L = \{00, 01, 10, 11\}$



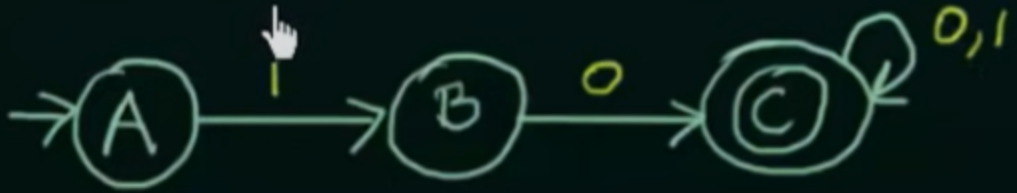
Ex 1) L1 = { Set of all strings that ends with '1' }



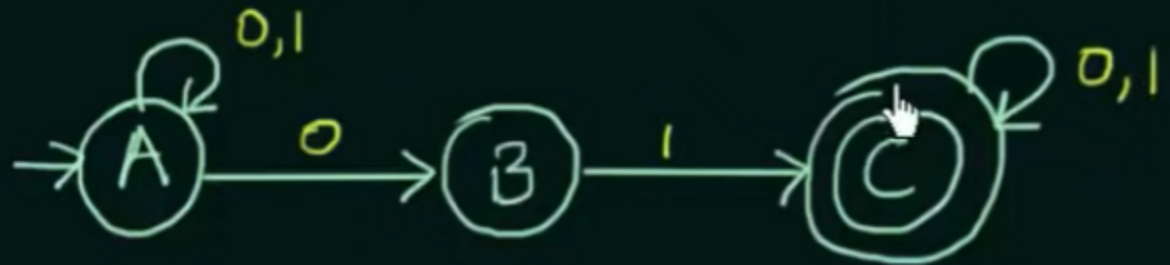
Ex 2) L2 = { Set of all strings that contain '0' }



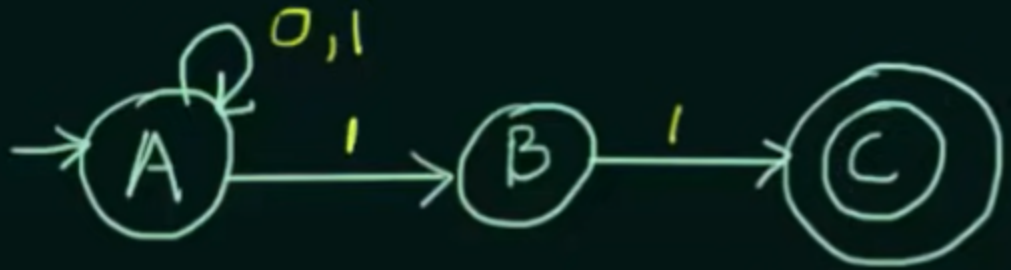
Ex 3) L3 = { Set of all strings that starts with '10' }



Ex 4) L4 = { Set of all strings that contain '01' }



Ex 5) L5 = { Set of all strings that ends with '11' }



Conversion of NFA to DFA

Every DFA is an NFA, but not vice versa

But there is an equivalent DFA for every NFA

L = { Set of all strings over (0,1) that starts with '0' }

$\Sigma = \{0,1\}$

NFA

	0	1
A	B	ϕ
B	B	B

DFA

	0	1
A	B	C
B	B	B
C	C	C

C - Dead state / Trap state

9:27

Conversion of NFA to DFA - Examples (Part 1)

L = { Set of all strings over (0,1) that ends with '1' }

$\Sigma = 0, 1$

NFA

	0	1
A	{A}	{A, B}
B	ϕ	ϕ

Sul

DFA

	0	1
A	{A}	{AB}
AB	{A}	{AB}

AB - single state

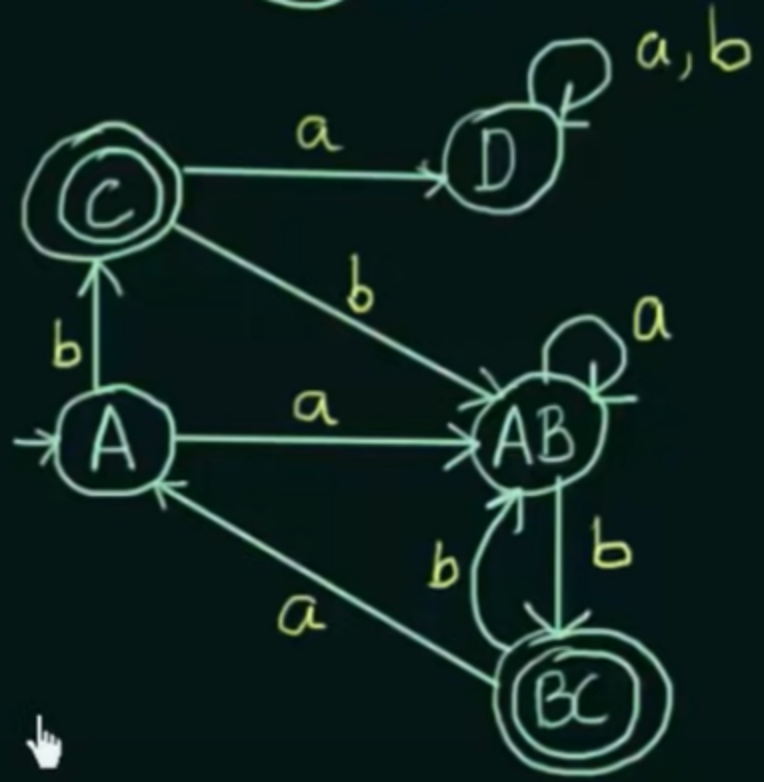
/ 9:05

Conversion of NFA to DFA - Examples (Part-2)

Find the equivalent DFA for the NFA given by $M = [\{A,B,C\}, (a,b), \delta, A, \{C\}]$ where δ is given by:

	a	b
→ A	A, B	C
B	A	B
C	–	A, B

	a	b
→ A	AB	C
AB	AB	BC
BC	A	AB
C	D	AB
D	D	D



Conversion of NFA to DFA - Examples (Part-3)

Given below is the NFA for a language

L = { Set of all strings over (0,1) that ends with '01' }. Construct its equivalent DFA

NFA

	0	1
→A	A, B	A
B	ϕ	C
C	ϕ	ϕ

DFA

	0	1
→ A	AB	A
AB	AB	AC
AC	AB	A

Eg. 1010
110
1101010

NFA

	0	1
→A	A	A,B
B	C	C
C	ϕ	ϕ

DFA

	0	1
→A	A	AB
AB	AC	ABC
AC	A	AB
ABC	AC	ABC

6 / 11:34

Minimization of DFA

Minimization of DFA is required to obtain the minimal version of any DFA which consists of the minimum number of states possible

If $|X| = 0$, then A and B are said to be 0 equivalent

If $|X| = 1$, then A and B are said to be 1 equivalent

If $|X| = 2$, then A and B are said to be 2 equivalent

$\vdots$

If $|X| = n$, then A and B are said to be n equivalent

0 Equivalence : {A, B, C, D} {E}

1 Equivalence : {A, B, C} {D} {E}

2 Equivalence : {A, C} {B} {D} {E}

3 Equivalance : {A, C} {B} {D} {E}

A, B ✓

A, C ✓

C, D ✗

	0	1
→ A	B	C
B	B	D
C	B	C
D	B	E
E	B	C

A state is said to be Unreachable if there is no way it can be reached from the Initial State

University Area, Plot No. III-B/5, New Town, Action Area - III, Kolkata - 700160

B.C.A Fifth Semester Examination, 2022-2023

ADMIT

Name of the Candidate:	***NITIN JAIN***
Father's / Guardian's Name :	*MAHAVEER PRASAD JAIN*
Registration Number:	***304202000400003***
Enrollment No.:	***12020004009003***

Schedule of Regular Examination (Th. & Pr.)

Paper Code	Paper Name	Exam. Date	Exam. Time	Invi. Sig.
BCA581	Industrial Training	Follow Departmental Practical Exam Schedule `	3hrs	
BCA583	Machine Learning using Python	Follow Departmental Practical Exam Schedule `	3hrs	
BCA592	Minor Project	Follow Departmental Practical Exam Schedule `	3hrs	
BCA582	Automata & Natural Language Processing	Follow Departmental Practical Exam Schedule `	3hrs	
BCA(GS)581	Skill Development for Professionals - V	Follow Departmental Practical Exam Schedule `	3hrs	
BCA591	Unix and Networking Laboratory	Follow Departmental Practical Exam Schedule `	3hrs	
BCA(GS)501	Essential Studies for Professionals - V	21-11-2022	2:00 pm - 5:00 pm	
BCA501	Cyber Security & Ethical Hacking	23-11-2022	2:00 pm - 5:00 pm	
BCA502	Unix and Shell Programming	25-11-2022	2:00 pm - 5:00 pm	
BCA504	Management and Accounting	28-11-2022	2:00 pm - 5:00 pm	

(Exam dates are subject to unavoidable changes; Subjects should not be altered under any circumstances)
